Instacart is excited to announce our first public dataset release, "The Instacart Online Grocery Shopping Dataset 2017". This anonymized dataset contains a sample of over 3 million grocery orders from more than 200,000 Instacart users.
For each user, we provide between 4 and 100 of their orders, with the sequence of products purchased in each order. We also provide the week and hour of day the order was placed, and a relative measure of time between orders.
